Your health, safety, and privacy are at stake...

January 14, 2017

To Whom It May Concern:

The World Health Organization has classified the electromagnetic radiation emitted by cell phones and cell towers as a Class 2B carcinogen and you want to go ahead and roll out more of these toxic cell towers?

Thousands of peer reviewed independent studies have proven that cell towers pose a risk to humans and the environment and you want to roll out 5G infrastructure?

Epidemiologists have found increased rates of depression, suicide, breast cancer, and headaches within 1 mile of cell towers, and yet you want to go ahead and put these in people's backyards?

I don't think so.

These are people's HOMES.

These are people's LIVES.

This is their *HEALTH* we are talking about.

I know you don't give a damn about our health. I know you don't give two craps about who dies and who lives. But this is too much. We have been putting up with this atrocity much too long. Smart-meters, Wi-Fi in schools, and now 5G? Enough is enough.

It's time to get your dirty act together.

If you want to *really* act in the best interest of the people, stop deploying 5G, and every other cell tower. The FCC's already got a bad rap as "the industry that don't care about nobody but themselves". And yet, you want to keep being the bull on the block?

With absolutely no respect whatsoever,

Naveen Albert
